**DETAILED ACTION**

The Amendment filed April 1, 2004 has been received, entered into the record, and carefully considered. The following information provided in the amendment affects the instant application by:

Claims 33, 50, and 52-54 have been amended.

Claims 64-65 have been cancelled.

***Allowable Subject Matter***

Claims 33-48, 50-56, 58-63, and 66-70 are allowed.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Bonham on 3/31/2004.

The application has been amended as follows:

The abstract has been replaced by the following abstract:

## ABSTRACT

Novel nitric-oxide releasing lipid molecules are provided which comprise a lipid molecule selected from (a) phosphoglycerides, (b) lipids having a sphingosine base as a backbone, (c) monoacylglycerols, (d) diacylglycerols, and (e) glycosylacylglycerols, wherein the lipid molecule is provided with a nitric-oxide containing group which comprises (a) a  $\text{---S---N=O}$  moiety, (b) a  $\text{---O---N=O}$  moiety, or (c) a  $\text{>N---N=O}$  moiety. Also provided are methods of forming such nitric oxide releasing lipid molecules. Various pharmaceutical compositions, topical liquids and drug delivery systems comprising the nitric-oxide releasing lipid molecules are also described. Further provided are methods for therapeutically administering nitric oxide to patients, methods of treating or preventing various conditions, methods for promoting wound healing and methods of reducing the cells present in an atherosclerotic lesion, which methods utilize the nitric-oxide releasing lipid molecules.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest the drug delivery system as claimed wherein applicants use of a medical article comprising the specific lipid molecules (sphingosine base, phosphoglycerides, mono-, di-, or glycosly-acylglycerols) as nitric oxide releasing compounds is not taught or seen to be obvious in light of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
